## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are indefinite because they are replete with limitations lacking sufficient antecedent bases. For example, the recited limitations "the sample" (line 1 of claim 1), "the colour" (line 2 of claim 1), "it" (line 4 of claim 1), "the screen" (line 2 of claim 10), just to name a few, all lack sufficient antecedent bases.

## Claim Rejections - 35 USC § 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 3-4, and 9-11, are rejected under 35 U.S.C. 102(b) as being anticipated by Jung et al. (6254385 B1).

Jung et al. disclose a method and device for determining a sample of a color coding ring/chart 404 closet to the color of at least a part of at least one element of a patent 402's set of teeth (Fig. 26), with the aid of imaging means comprising a video camera (abstract; , the method and device comprising the steps of and/or means of: inputting and freezing on the screen a color image of the patent's set of teeth element

Art Unit: 3732

(column 32 lines 37-39); filming the color coding ring/chart 404 and displaying on the screen the image; the image of the sample color is shown to be lying side by side the frozen image of the patient's set of teeth without any separation; and visually comparing the two images (Fig. 26; column 33 lines 54-65).

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 2, 5-8, and 12-13, are rejected under 35 U.S.C. 103(a) as being unpatentable over Jung et al. (6254385 B1).

Jung et al. disclose the invention substantially as claimed. However, Jung et al. are silent to the samples of the color coding ring/chart are made to advance on the screen (claim 2). Jung et al. are also silent to controlling or inhibit the automatic controlling of the chrominance and luminosity of the video camera (claims 5-8 and 12-13).

The claim sample-advancing technique is well known, e.g. Microsoft Word<sup>TM</sup> has a color chart for the users to select a color for the font, each color in the color chart can be advanced to be previewed for selection. It would have been obvious to one having ordinary skill in the art at the time the invention was made to advance the samples of the color coding chart so that each sample can be individually evaluated next to the patient's tooth. Furthermore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Jung et al. by controlling or inhibiting the automatic control of the chrominance and/or luminosity

Application/Control Number: 10/520,916 Page 4

of the video camera. Such control on the chrominance and/or luminosity of the video camera is

merely a matter of choice well within the skill of an artisan obtained via routine experimentation

in order to achieve an optimum match between the real object and the image of the object

captured by the video camera.

**Conclusion** 

7. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to HAO D. MAI whose telephone number is (571)270-3002. The examiner

can normally be reached on Monday-Friday. If attempts to reach the examiner by telephone are

unsuccessful, the examiner's supervisor, Cris Rodriguez can be reached on (571) 272-4964.

The fax phone number for the organization where this application or proceeding is assigned is

571-273-8300.

8. Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you

would like assistance from a USPTO Customer Service Representative or access to the

automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
